

California Right Meds COLLABORATIVE

Spring 2026 Learning Session

Delivering Advanced Patient Care Services Through Pharmacies and Partnerships

The California Right Meds Collaborative (CRMC) is a sustainable and scalable, value-based medication therapy optimization initiative established in partnership with the Los Angeles County Department of Public Health, the Centers for Disease Control and Prevention, the California Pharmacists Association, health plans, and a curated network of community pharmacies. CRMC is dedicated to advancing chronic disease control and population health outcomes across local communities. The Spring 2026 Learning Session, sponsored by the Los Angeles County Department of Public Health, equips pharmacists, CHWs, and healthcare teams with actionable strategies to deliver advanced patient care through pharmacies and partnerships. This virtual event blends expert keynotes, payer insights, real-world spotlights, and a cardiometabolic bootcamp. Through the Department's sponsorship, participation costs are subsidized, thereby ensuring greater accessibility and engagement among community pharmacy partners committed to expanding mental health and chronic disease services.

**HOURS OF CONTINUING
EDUCATION FOR
PHARMACISTS**

Event Highlights:

Join us for a dynamic day of interactive sessions, including polling, breakout discussions, and chat-based takeaways to drive immediate practice improvements.

- This year's keynote by Dr. Jessica Nunez deYbarra reveals how policy shifts, care gaps, and pharmacist-led team models are redefining chronic care in California
- CRMC 2.0 Evolution: Payer insights on priorities, transition details, billing updates, hybrid models, and new training/partnerships.
- Practice Spotlights: Lessons from leading CRMC pharmacy practices and a health system's heart failure program—key success factors, patient engagement tactics, and impact metrics.
- Cardiometabolic Bootcamp: 2026 updates on diabetes (incl. GLP-1 RAs, prevention, alternatives), hypertension, and dyslipidemia—guidelines, CMM applications, documentation, and lifestyle supports.
- Patient Engagement Panel: CHWs and clinical pharmacy technicians share proven strategies for enrolling hesitant patients and boosting retention in CRMC programs.

TIME, DATE AND COST

Sunday, April 26, 2026
9:00am to 3:40pm
Cost: \$20

LOCATION

Virtual via Zoom

GOAL

Prepare pharmacists to initiate sustainable CMM services for improved health outcomes among patients with chronic conditions.

TARGET AUDIENCE

Pharmacists committed to optimizing medication therapy for patients with chronic conditions.

USCMann

The University of Southern California School of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This application-based activity was assigned Universal Activity Number 0007-0000-26-019-L04-P for 5.5 contact hours (0.55 CEUs) with an initial release date of April 26, 2026 and expiration date of April 26, 2029. This statement contains information provided to NABP from ACPE via CPE Monitor®. ACPE policy states paper and/or electronic statements of credit may no longer be distributed directly to learner's as proof of ACPE credit. The official record of credit may be located in the learner's profile in CPE Monitor®.

CRMC SPRING 2026 LEARNING SESSION CONFERENCE KEYNOTE SPEAKER

Jessica Nunez deYbarra, MD, MPH
Community Health Medical
Administrator
California Department of Public Health

This year, we are proud to welcome Dr. Jessica Nunez deYbarra as our keynote speaker, presenting a powerful and timely talk on the evolving landscape of chronic care in California. In “Less to Work With, More at Stake: The New Reality of Chronic Care,” she will unpack how shifting national and state policies are reshaping healthcare delivery, often leaving providers with fewer resources while patient needs continue to grow. This session will spotlight critical gaps in chronic disease management and highlight the vital role pharmacists can play in closing those gaps. Attendees will gain insight into innovative, team-based care models that leverage pharmacists’ expertise to improve outcomes—especially for the most vulnerable populations. Walk away with a clearer understanding of where healthcare is headed and how collaborative care can drive meaningful change.
